

We have recently installed two Electric Vehicle Charging Stations at Castlewood House. These stations allow users of Electric Vehicles (EV) or Hybrid Vehicles to easily charge their cars whilst staying at our property.

Many of our guests have been asking if we have this facility, and we expect it to become much more frequent in the coming years. Therefore we have recently installed two electric chargers at Castlewood House. EV chargers are becoming more of a necessity in Ireland as more car hire companies and our guests chose Hybrid and Electric Vehicles, during their stay in Ireland.

There are two 22Kw chargers in our private car park, (we offer free parking for our guests) which are available for guests staying with us. There is a small nominal fee per charge, which we can add to your account. Charging is really easy - simply plug in, charge up, and then plug out.

We are always trying our very best to facilitate our guests and to ensure that we make your stay with us memorable.

Happy Driving!
